# COMT-2: CERVICAL: GATEWAY TO MUSCULOSKELETAL THERAPY

This course is designed to equip the clinician with the proper subjective and objective evaluation to determine the appropriateness of physical therapy, recognize the need for a referral for signs and symptoms of serious pathology and generate a provisional differential diagnosis of the cervical spinal dysfunction. Furthermore, intervention techniques and management of common spinal pathologies are demonstrated, including soft tissue techniques and joint articulation techniques. Neuromuscular reeducation and therapeutic exercises are introduced to reinforce each manual treatment.
